

WOMEN IN FINANCE CHARTER

OUR COMMITMENTS

The Women in Finance Charter is a commitment between HM Treasury and signatory firms to work together to make our sector more balanced and fair. The Charter reflects the Government's aspiration to see gender balance at all levels across financial services firms. By signing the Charter we've formally committed to promoting gender diversity in BNP Paribas Personal Finance.

"Our ambition is to create a great place to work and we are proud of the diverse and inclusive working environment that we have created, and gender diversity is simply part of our culture. It is an important aspect of our commitment, particularly at senior levels within our organisation, and I am personally proud to take a leading role in driving this change, not just for our business but also the industry."

"Across our business currently our colleague base is split 53% male and 47% female, however, at senior management levels, women are less represented, at 37%, and I want to see this change."

HOW DO WE DEFINE OUR SENIOR MANAGEMENT TEAM?

We have chosen this wider definition of senior managers as it means we can start to ensure that female managers receive appropriate support at an earlier point along the career pipeline, whether via development, mentoring or implementing appropriate working conditions policies that will allow women to reach the highest levels in the organisation.
